

# ***Miriam, we need a word.***

Born on 09.04.1988 at 07:45 in Hamburg. The stars saw everything. Absolutely everything. Here's what they have to say, with plenty of affection and just enough cheek.

**Sun Aries • Moon Capricorn • Rising Taurus**

## ***The big three***

**Sun in Aries:** You said yes before anyone finished the question. Your idea of patience is letting someone else draw breath before you interrupt.

**Moon in Capricorn:** You cry once a year: booked in, efficiently, without witnesses. There's a calendar invite.

**Rising in Taurus:** You look so relaxed people ask where you bought your life. You simply refused next-day delivery.

## ***Mind & mouth***

**Mercury in Aries:** You send the message before finishing the thought. The correction arrives as three more messages.

## ***Love & battle***

**Venus in Gemini:** You fall for a sentence, then a joke, then possibly the person attached to them.

**Mars in Aquarius:** You rebel against rules, especially the ones you invented yourself.

## ***Your inner control freak***

**Saturn in house 9:** You plan spontaneous trips six months in advance.

## ***Your aspects: the plot twists***

**Moon & Pluto:** You read the room before anyone has opened their mouth. Quite inconvenient for liars.

**Moon & Neptune:** You absorb moods like a sponge, including a stranger's on the bus.

**Mercury & Neptune:** You tell stories so beautifully the facts politely step aside.

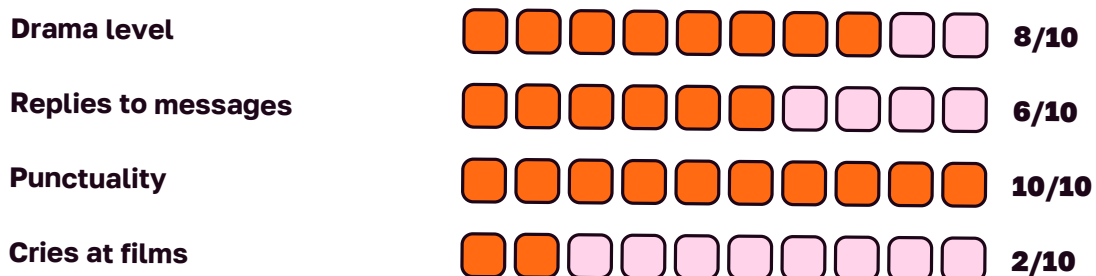

## ***Element balance***

Lots of earth: you bring a charger, snacks and travel insurance on a spontaneous trip.

Little water: feelings sound fascinating. You've heard very interesting rumours.

## ***Your roast profile***

Measured by the stars, on a scale of ten:

# ***Miriam, you're brilliant.***

Your courage gets people moving. Half your friends would still be discussing the plan without you.

***The stars give you 10 out of 10. Would rise again.***

## ***The small print***
